

Design Doc for Proj5

Makefile:

Added line QEMUEXTRA = -snapshot.

Added testfs. to UPROGS

Param.h:

Define FSSIZE as 20,000.

file.h:

Change size of addrs to NDIRECT+2

fs.h:

Define NDOUBLYINDIRECT to 128*128

Change NDIRECT to 11, MAXFILE to include NDOUBLYINDIRECT, size of addrs to NDIRECT+2

fs.c:

implemented doubly indirect block in bmap() after if blocks that looks at indirect pointers. Essentially navigating through levels of maps to get to the actual data block array in the third level.
